### ***Allowable Subject Matter***

4. Claims 4-11 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Regarding claim 4 and 5 the prior art of the record in particular Shimizu'155 does not teach or suggest a supporting a method for positioning a rotational position sensor for a rotating electric machine , a stator including inter alias ; a position sensor and a detection stator, a signal rotor fixed to a rotation axis of the rotor, the method further comprising; constraining the rotor from

rotating by energizing the stator coil; detecting the rotor to be rotated by at least a predetermined angle; and adjusting the position of the detection stator or the signal rotor so that the detection stator outputs a predetermined signal.

5. Regarding claim 7 the prior art of the record in particular Shimizu'155 does not teach or suggest a supporting method for positioning a rotational position sensor for a rotating electric machine which comprises a stator including a stator coil, and a rotor including a magnetic pole composed of a permanent magnet, wherein the rotational position sensor comprises a signal rotor fixed to a rotation axis of the rotor, including inter alias, fixing the magnetic pole and the signal rotor in a predetermined positional relation in a rotational direction constraining the rotor from rotating by energizing the stator coil; detecting the rotor to be rotated by at least a predetermined angle and adjusting the position of the detection stator so that the detection stator outputs a predetermined signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled comments on Statement of Reasons for Allowance."
